# Jack Ruby Has Cancer, Doctors Say

DALLAS, Dec, 10 (UPI) Doctors at Parkland Hospital disclosed today that Jack Ruby, the slayer of presidential assassin Lee Harvey Oswald, is suffering from cancer.

Doctors Jay Sanford and Watts Webb of the Southwestern Medical School in Dallas, said Ruby had been operated on early today and that cancer had been found in Ruby's lymph node. They said it had spread from some other part of his body. They said they did not know whether the cancer could be arrested.

Doctors at the hospital gave Ruby a preliminary diagnosis of pneumonia when he first entered the hospital Friday.
